EDUCATION

University of Central Oklahoma B.S Computer Sci. & B.S Software Engineering	Edmond, OK	3.8 GPA	May 2028
Francis Tuttle Computer Science Academy & Deer Creek High School	Oklahoma City, OK	4.2 GPA	May 2025

EXPERIENCE

Hobby Lobby Backend Development Intern, Oklahoma City OK May 2026 - Aug 2026

- Built a microservice release management app to create and view releases in OpenShift cluster environments
- Integrated backend with PCI DSS application to automate documentation with commit and JIRA ticket info
- Used ASP.NET 10 Core for cache layer and backend endpoints between Angular frontend and Github API
- Designed and implemented request/response contracts for endpoints between layers in TypeScript and C#

UCO OIT Application Services Intern, Edmond OK Jan 2026 - May 2026

- Used Python and Microsoft REST APIs to automate pulling dataset and data source info from Power BI
- Delivered technical support for 80+ campus applications, tracking and resolving issues via TeamDynamix
- Helped develop and update university subdomains with the Web Services team in Cascade CMS

iCode School Instructor, Edmond OK May 2023 - Dec 2025

- Taught Java, Python, Linux, and Arduino to middle and high school students and improved the curriculum
 - Mentored students on how to use analytical thinking and programming to solve complex problems
 - Constantly adapted teaching style to students' needs to create an engaging and supportive environment
-

PROJECTS

PawwPrint | Mobile App | Social Media for Pets Owners May 2025 - Sep 2025

- Developed a full stack mobile application using Dart and the Flutter library
- Used a Firebase Realtime Database and Cloud Storage to save media posted by users
- Followed android and apple requirements for beta testing and launch of app in both app stores

Project Inflow | Capstone Project for OG+E Jan 2025 - May 2025

- Partnered with OG+E to develop a .NET Blazor based C# and HTML application
- Transformed raw badge in and out CSV exports into interactive dashboards with graphs and heatmaps
- Enhanced safety and preventative maintenance by identifying trends and anomalies

Voicelt | Mobile App | Congressional App Challenge Champion Oct 2024 - Apr 2025

- Developed an Android application with Java and XML
- Enabled users to create, sign, and share petitions in the app
- Won First Place in the Congressional App Challenge hosted by Congresswoman Stephanie Bice

Petalytics | .NET Blazor Web Framework App Aug 2024 - Dec 2024

- Co-developed a full stack .NET Blazor based desktop application built with C#, HTML, and .txt backend
- Tracked price changes and streamlined product ordering for flower shops
- Resulted in a 15% revenue increase for a client after several months of use

BuddySystem | Mobile App | Software Development State Champion Jan 2024 - Jul 2024

- Developed an Android application with Java and XML
 - Enabled users to create and attend peer organized social and educational events posted in the app
 - Won First Place in Software Development at the Technology Student Assoc. Oklahoma State Conference
-

TECHNICAL SKILLS

- Languages - C++, C#, TypeScript, Python, Java, Dart, HTML, JavaScript
- Frameworks - .NET Blazor, Flutter, ASP.Net Core, Angular
- Databases - Firebase Realtime Database, Firebase Cloud Storage, MS SQL
