EDUCATION

University of Central Oklahoma	B.S Computer Sci. & Software Engineering	3.85 GPA	Aug 2025 - May 2028
Francis Tuttle Technology Center	Computer Science Academy	4.2 GPA	Aug 2022 - May 2025

EXPERIENCE

UCO OIT Cloud Data Center and Network Services Intern Aug 2026 - Dec 2026

- Developing and maintaining an internal, Python based Network Operations Center web application
- Leverage Cisco Catalyst Center API to track, manage, and monitor network with 200,000+ endpoints
- Deploy and configure enterprise networking hardware, including core switches and fiber optic infrastructure

Hobby Lobby Backend Development Intern May 2026 - Aug 2026

- Built and deployed a microservice release management app to create and view releases in 4 OpenShift clusters
- Integrated backend with PCI DSS app to automate populating documentation with commit and JIRA ticket info
- Used ASP.NET Core 10 for cache layer and backend endpoints between Angular frontend and Github API
- Designed and implemented request/response contracts for endpoints between layers in TypeScript and C#

UCO OIT Application Services Intern Jan 2026 - May 2026

- Used Python and Microsoft REST APIs to automate pulling dataset and data source info from Power BI
- Delivered technical support for 80+ campus applications, resolving over 550 ticket issues via TeamDynamix
- Helped develop and update university subdomains with the Web Services team in Cascade CMS

Capstone Project for Oklahoma Gas & Electric Corp Jan 2025 - May 2025

- Built an app that transformed badge in/out CSV exports into interactive dashboards with graphs a heatmap
- Enhanced safety and preventative maintenance by identifying trends and anomalies from data
- Automated data visualization workflow using ASP.NET Core 8 Blazor with C#, cutting hours to seconds

iCode School Lead Instructor May 2023 - Dec 2025

- Taught Java, Python, Linux, and Arduino to middle and high school students and improved the curriculum
 - Mentored students on how to use analytical thinking and programming to solve complex problems
 - Adapted teaching style to student needs, creating an engaging environment and a 100% graduation rate
-

PROJECTS

PawwPrint | Mobile App | Social Media for Pet Owners May 2025 - Sep 2025

- Developed a full stack mobile application using Dart and the Flutter library
- Used a Firebase Realtime Database and Cloud Storage to save media posted by over 300 users
- Followed Android and Apple requirements for beta testing and launch of app in both app stores

Voicelt | Mobile App | Congressional App Challenge Champion Oct 2024 - Apr 2025

- Won First Place in the Congressional App Challenge hosted by Congresswoman Stephanie Bice
- Developed an application with Java and XML that enabled users to create, sign, and share petitions
- Presented application at #HouseOfCode event to Members of Congress in Washington, D.C.

Petalytics | .NET Blazor Web Framework App Aug 2024 - Dec 2024

- Co-developed a full stack ASP.NET Core 9 Blazor based desktop application built with C# and HTML
- Tracked price changes, streamlined product ordering, and kept inventory for flower shops
- Resulted in a 15% revenue increase for a client after several months of use

BuddySystem | Mobile App | Software Development State Champion Jan 2024 - Jul 2024

- Won First Place in Software Development at the Technology Student Assoc. Oklahoma State Conference
 - Developed an Android application with Java and XML with user authentication and event discovery features
 - Enabled users to create and attend peer organized social and educational events posted in the app
-

TECHNICAL SKILLS

- Languages - C++, C#, TypeScript, Python, Java, Dart, HTML, JavaScript
- Frameworks - .NET Blazor, Flutter, ASP.Net Core, Angular
- Databases - Firebase Realtime Database, Firebase Cloud Storage, MS SQL
- Tools & DevOps: Git, GitHub, OpenShift, REST APIs, JIRA, Jenkins, Splunk, Linux
